A: Sir **Lancelot**

13. What animal is found in the name of a Chinese legend about two tragic lovers, who are reincarnated into it after their deaths?
A: **butterfly**

Jackpot

14. Part 1: What number is the sum of the infinite series $1 \text{ over } 0 \text{ factorial}$, plus $1 \text{ over } 1 \text{ factorial}$, plus $1 \text{ over } 2 \text{ factorial}$, and so on?
15. Part 2: This number raised to the power of i times π is equal to negative 1.
16. Part 3: If someone invested one dollar with a return rate of 100% compounded continuously, they would have exactly this many dollars after one year. This number is the base of the only exponential function that is its own derivative.
17. Part 4: The base of the natural logarithm, this transcendental number is slightly above 2.7.
A: **e** (accept: **Euler's** number)

Set of 3: Labrador

18. What is the only province that shares a land border with Labrador?
A: **Quebec**
19. What landmark gives its name to the largest power station in Labrador, which was the subject of a December 2024 energy-sharing agreement with Quebec?
A: **Churchill Falls**
20. Labrador is separated from Newfoundland by what strait?
A: Strait of **Belle Isle**

5-Part Blitz

21. Along with Massachusetts and Maine, what other four states make up New England?
A: **Connecticut** AND **Rhode Island** AND **Vermont** AND **New Hampshire**
22. Dividing the amount of solute by the mass of the solvent gives what quantity?
A: **molality** (reject: molarity)
23. Prevalent in France in the second half of the 19th century, what art movement depicted everyday people and scenes in a straightforward manner?
A: **Realism** (accept: **Realist** movement/art)

A: **343**
33. What kind of service do companies like Ekos, Nanos, Léger, and Gallup provide?
A: opinion/election **polling**

Double Jump

34. Begging the question, strawman, and circular reasoning are all examples of what kind of error in an argument?
A: informal logical **fallacy**
35. Formal fallacies, such as affirming the consequent, rob an argument of what property, whereby the truth of its premises necessitates the truth of its conclusion?
A: **validity**

Double Jump

36. What number is used in C, Java, and Python, but not in MatLab, as the starting index of an array or list?
A: **0**
37. In C, strings are stored as character arrays with an additional element of what character at the end? This character is represented using the escape sequence backslash zero.
A: **NULL** character/terminator

Set of 4

38. A venue known as "the big top" would host what kind of entertainment production?
A: **circus**

39. In a traditional circus, what name is given to the event's host who introduces each act?
A: **ringmaster**
40. Varekai, Kooza, and Ovo are all productions of what circus company founded in Montreal?
A: **Cirque du Soleil**
41. Who joined forces with James Bailey in 1881 to form a circus billed as "The Greatest Show on Earth"?
A: P.T. **Barnum**

Set of 4: Mars

42. What American composer drew heavy influence from Holst's "Mars" to compose the main theme to the *Star Wars* films?
A: John **Williams**
43. The first pair of American Mars landers shared what name?
A: **Viking**
44. What are the two main fillings of a Mars bar?
A: **caramel** AND **nougat**
45. What twins did Rhea Silvia father with Mars?
A: **Romulus** AND **Remus**

Linked Set of 5

46. Onomatopoeias such as "bam", "pow", and "splat" were commonly shown on what 1960s TV series starring Adam West as a DC superhero?
A: **Batman**
47. What 2024 HBO series stars Colin Farrell as the titular Batman villain?
A: *The* **Penguin**

A: **libretto**
58. What company organises and broadcasts the annual summer Proms concerts, held at the Royal Albert Hall?
A: **BBC** (accept: **British Broadcasting Corporation**)

Set of 3: Quantum Mechanics

59. Who discovered the fact that the more precisely a particle's location is known, the less precisely its velocity can be known?
A: Werner **Heisenberg**
60. The probability of a particle being in a given location at a given time can be determined with what kind of mathematical model, which "collapses" into one certain position when a particle is observed?
A: **wave functions**
61. Quantum mechanics is so far unable to explain what force, which is instead explained by general relativity?
A: force of **gravity** (accept: **gravitation**)

Jailbreak

62. What son of Odin avenges him by killing Fenrir and goes on to survive Ragnarok?
A: **Vithar** (accept: **Vidar**)
63. What city is currently the capital of China's Jiangsu province, and was the capital of the Republic of China from 1927 to 1949?
A: **Nanjing** (accept: **Nanking**)
64. Flippases and floppases are enzymes that transport lipids across what outer layer of an animal cell?
A: cell **membrane** (accept: **plasma membrane**)
65. What three colours are found in the titles of a trilogy of films by Krzysztof Kieslowski ["KSHISH-toff kyesh-LOFF-ski"], centred respectively on the themes of liberty, equality, and fraternity?
A: **blue** AND **white** AND **red**

A: **Loud Luxury**
68. Before the rise of Labour, what was the main rival of Britain's Conservative Party?
A: **Liberal** Party
69. What American is the author of the *Stormlight Archive* and the *Mistborn* trilogy?
A: Brandon **Sanderson**
70. What word refers to the centre of gravity around which a binary star system orbits?
A: **barycentre**

71. What specific kind of tool, designed to cut irregular curves such as stenciled designs, names a type of puzzle that was originally called a "dissected map"?
A: **jigsaw**
72. What is the largest island at least partially owned by Indonesia?
A: **New Guinea**
73. What is 64 to the power of one-third?
A: **4**
74. The Galapagos Islands are owned by what country?
A: **Ecuador**
75. What is the bottom-most of the three layers of skin tissue?
A: **hypodermis**

END OF THIRD QUARTER

FOURTH QUARTER

Jackpot

76. Part 1: What band graphically described vomit as "oatmeal pizza" and "stomach acid worms that dance in sugared sludge" in their song "Mexican Seafood"?
77. Part 2: In another song, this band described how they would "chew your meat for you / pass it back and forth / in a passionate kiss / from my mouth to yours".
78. Part 3: The chronic stomach pains suffered by this band's lead singer inspired the song "Pennyroyal Tea", which was included on their *MTV Unplugged in New York* album, and also led to his heroin addiction.
79. Part 4: This band depicted an anatomical mannequin with angel wings on the cover of *In Utero*, shortly before the death of Kurt Cobain.
A: **Nirvana**

Streak

80. Name up to any four of the seven namesake divisions, formerly part of the Trucial States, that make up the
- A: **Dubai**
- A: **Abu Dhabi**
- A: **Sharjah**
- A: **Ajman**
- A: **Ras Al Khaimah**
- A: **Fujairah**
- A: **Umm Al Quwain**

Set of 3: Models

82. What model walked down the runway to "The Girl from Ipanema" at the opening ceremony of the 2016 Olympics, held in Rio?
A: Gisele **Bündchen** (prompt on: Gisele)
83. Associated with Gia Carangi and Kate Moss, what controversial 1990s modelling style was characterized by pale skin, dark eye circles, and thinness, supposedly to mimic drug use?
A: **heroin chic**
