A: regular **hexagons** (accept: **hexagonal**)
50. What country is often said to geographically resemble a hexagon?
A: **France**

END OF FIRST HALF

THIRD QUARTER

Splits: Mathematical Approximations & Poets by Opening Lines

Mathematical Approximations

51. What mathematical constant is very close to the ratio between a mile and a kilometre?
A: **golden ratio** (prompt on: phi)

52. Who gives his name to a method for estimating seemingly impossible-to-calculate values by combining several reasonable approximations?
A: Enrico **Fermi**
53. What integer divided by 7 is often used to approximate pi?
A: **22** divided by 7
54. It is often joked that engineers consider both e and pi to be equal to what integer?
A: **3**

Poets by Opening Lines

Given the opening lines of two poems, name the author who wrote both.

55. "Let me not to the marriage of true minds" and "Shall I compare thee to a summer's day"?
A: William **Shakespeare**
56. "That is no country for old men" and "Turning and turning in the widening gyre".
A: W.B. **Yeats** ["Yates"] (accept: William Butler **Yeats**)
57. "My life had stood - a loaded gun" and "Because I could not stop for death".
A: Emily **Dickinson**
58. "You may write me down in history" and "A free bird leaps".
A: Maya **Angelou**

Set of 3: Seasonal Restaurant Menu Items

59. Originally lemon-lime flavoured and currently mint flavoured, what seasonal McDonald's item is designed to celebrate St. Patrick's Day?
A: **Shamrock Shakes**
60. What restaurant chain suffered an 11-million-dollar loss after making its formerly seasonal promotion Endless Shrimp into a permanent menu item?
A: **Red Lobster**
61. First rolled out in 2003, cloves, ginger, nutmeg, and cinnamon are mixed with a puree of the titular vegetable to create what autumnal drink sold by Starbucks?
A: **Pumpkin Spice Lattes** (prompt on: P.S.L.s)

Jailbreak

62. What word refers to the things that are studied in histology?
A: **tissues**
63. What is the capital of China's Heilongjiang province, known for hosting a massive snow and ice festival?
A: **Harbin**
64. Founded by Derek Jeter, what sports journalism platform publishes first-person stories and articles by professional athletes?
A: *The* **Players' Tribune**
65. The first month of what conflict is narrated in Barbara Tuchman's book *The Guns of August*?
A: **World War I** (accept: **First World War**)
66. An octet with a clarinet, a bassoon, and a horn, along with string quartets like "Rosamunde" and "Death and the Maiden", are all chamber works by what composer?
A: Franz **Schubert**
67. Brandon Routh, Christopher Reeve, and David Corenswet have all played what superhero in movies?
A: **Superman** (accept: **Kal-El**)

68. What song, described by Paste Magazine as sounding like “if someone fed Imagine Dragons’ entire discography into ChatGPT” and featuring in a widely mocked trailer for the show *9-1-1* as meteors rain down on L.A., was a chart-topping hit for Alex Warren?
A: **“Ordinary”**
69. Hirsch and Buchner name types of what laboratory equipment, wide at the top and narrow on the bottom?
A: **funnels**
70. Anne Elliot breaks off her engagement to Frederick Wentworth at the start of what Jane Austen novel?
A: ***Persuasion***
71. Stephanie Brown, Tim Drake, and Jason Todd have all held what superhero alias, the sidekick to Batman?
A: **Robin**

A: **Morocco**
75. What singer takes a “Louisville Slugger to both headlights” of a “pretty little souped-up four-wheel drive” in her song “Before He Cheats”?
A: Carrie **Underwood**

END OF THIRD QUARTER

FOURTH QUARTER

Jackpot

76. Part 1: What objects can be divided based on their composition into carbonaceous, metallic, and stony or siliceous types?
77. Part 2: These objects are also divided into inner, intermediate, and outer groups by gaps located around resonances of 3:1 and 5:2.
78. Part 3: The third-largest of these objects is Pallas and the second-largest is Vesta.
79. Part 4: Ceres is the largest of these objects, which orbit farther from the Sun than Mars but closer to it than Jupiter.
A: **asteroids** (accept: **meteors**/**meteoroids**/**meteorites** on Part 1 only)

Streak

80. Name up to any eight types of naturally occurring, non-fungus wooden logs found in the overworld of *Minecraft*.
A: **oak** logs
A: **dark oak** logs
A: **pale oak** logs
A: **spruce** logs
A: **acacia** logs
A: **birch** logs

A: **mangrove** logs

A: **jungle** logs

A: **cherry** logs

Set of 5: Wilfrid Laurier

84. Soon after becoming prime minister, in which province did Laurier negotiate a compromise over the divisive issue of French Catholic schooling?

A: **Manitoba**

85. Another of Laurier's notable compromises was his decision to send only a small volunteer force, not the full army, to fight for the British Empire in what war?

A: Second Anglo-**Boer** War

86. Laurier lost the 1911 election primarily over what policy, which his Liberals supported for its economic benefits but the Conservatives opposed for fear of American influence?

A: **reciprocity** (accept: **free trade** with the United States) (accept clear equivalents that mention **free trade**)

87. Who shepherded historic levels of immigration to the Prairies as Laurier's Minister of the Interior?

A: Clifford **Sifton**

88. Laurier ended his political career by running in vain against what policy in the 1917 election?

A: military **conscription** (accept: the military **draft**)

12-Part Blitz

89. Calcium carbide reacts with water to form what gas?

A: **acetylene** gas (accept: **ethyne**)

90. In English, what number should you answer with if your French teacher asks you to calculate "quatre-vingt-dix plus soixante-dix"?

A: **160**

91. What city's main business district is the island of Yeouido ["YO-ee-doe"] on the Han River?

A: **Seoul**

92. *The Broken Column* is a self-portrait by what Mexican artist?

A: Frida **Kahlo**

93. Who established himself as dictator after a 1973 military coup that overthrew Salvador Allende as president of Chile?

A: Augusto **Pinochet**

94. What name is given to the chart on which the Q.R.S. complex can be found?

A: **electrocardiograms** (accept: **E.C.G.s**, **E.K.G.s**)

95. Who wrote a famous chamber composition with a title that translates as "A Little Night Music"?

A: Wolfgang Amadeus **Mozart**

96. In the 1990s, what country decided to hold open public hearings through a Truth and Reconciliation Commission rather than prosecute those who had previously enforced its policy of Apartheid?

A: **South Africa**

97. What type of animal must paleontologist David and heiress Susan take care of in a Howard Hawks screwball comedy starring Cary Grant and Katharine Hepburn?

A: **leopard** (prompt on: big **cat**)
